Mr. Christopher Kielb
Advanced Welding
47 Allston Street
West Springfield, MA

Dear Mr. Kielb,

As Director for the Career and Technical Education programs for the Chicopee School District, I thank you on behalf of our staff and students for hosting our Metal Fabrication and Joining Technologies students on May 17, 2012.

As an administrator, I can only admire the organizational skills that it took to arrange for this learning experience, not to mention the personal cost to the business. From the miniature welding lab to the robotic welder and fabulous automotive displays, this day was beyond compare. Most importantly, our students have learned from the day and they will not forget what Advanced Welding did for them. The day was truly inspirational.

Your continued willingness to assist our Career and Technical Education program with such learning experiences is very valuable to us. The fact that you are willing to organize and host such an educational opportunity once again propels you to the forefront of our community supporters.

Again, I thank you.

Sincerely,

Kenneth R. Widelo
Director of Career and Technical Education
